

POWER ACROSS TEXAS MISSION

As a non-partisan learning center, Power Across Texas draws from academic, political and private sector resources to provide balanced and reliable information, news analysis, and interactive resources that bring clarity and understanding to critical and complex energy issues in Texas. **Acting as an information forum for high-quality information tools, research and analysis, Power Across Texas balances the debate over the best way to ensure a clean, robust and reliable power supply in Texas.**

INITIATIVES

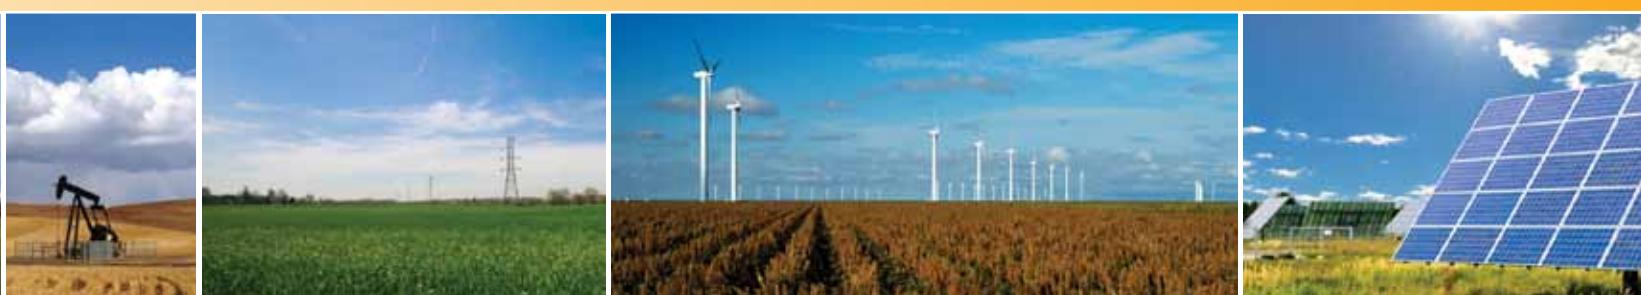

Forums and Discussions	WhyPower	Texas Interactive Power Simulator (TIPS)	Energy Primer Challenge	Power Minute
Power Across Texas brings together decision-makers, legislators, regulatory commissioners and energy leaders to have high-quality discussions, lectures, small-group forums, and other events.	Partnering with WhyVille, the Texas Governor's Office, and the Texas Workforce Commission, Power Across Texas has launched WhyPower to challenge 8th graders to develop a new green energy community from the virtual ground up. Students learn about energy and explore future possibilities for meaningful energy careers.	TIPS is an interactive online teaching tool that helps decision makers and the public better understand our energy challenges and choices. This tool was designed in partnership with The University of Texas at Austin to help people explore the tradeoffs in electricity generation fuel sources.	In partnership with predominant universities in Texas, the Energy Primer Challenge features interdisciplinary teams of students to develop primers in key areas of energy policy. This program is designed to get students engaged in dissecting issues that have potential for increased commercialization and regulatory/legislative attention.	What are industry leaders thinking about the future of power in Texas? Power Across Texas asks questions of energy experts about key industry issues and captures them on video. Watch scholars and industry leaders address timely topics affecting Texas' energy future.

STATE-WIDE REACH AND CONSTITUENCY

ADVISORY BOARD
